MATH/STATS PREREQUISITE CLEARANCE

If you are seeking prerequisite clearance to enroll in a Math/Statistics course, please be sure to keep in mind the following:

1. **If you are trying to register for a Fall 2021 course and are taking the prerequisite this Summer:** We can’t remove the prerequisite block until you have COMPLETED the course successfully. We cannot make exceptions to the policy.

   We understand you are concerned the course will be full by the time you finish your summer course. Many courses add seats or a section to accommodate the demand for a course. This policy is to be fair to all students that have completed the prerequisite during the Spring and to the many other students taking the prerequisite during the Summer.

2. **Once you’ve completed the prerequisite course, if at another institution we can help speed along the process by sending us the following:** (if the prerequisite is being taken at SDSU then the block will automatically be removed when the course is completed)

   1. Red ID
   2. Name of Course you are seeking enrollment
   3. Proof of prerequisite completion grade (i.e. AP scores from college board, Unofficial Transcripts from other institutions, etc.) *Note: Student Identification MUST be visible on proof provided
   4. Proof of completed request for AP scores/ transcripts sent to SDSU

3. **ALEKS Placement:** Note If you have recently completed the ALEKS placement Test; please allow 1 business day for your prerequisite hold to be removed before attempting to enroll in your Fall Math course. After 1-2 business days, you may email us with your RED ID for follow up.
